NEW TECHNOLOGIES

Blue Agave Software launches a new generation of applications to help manufacturers improve operating performance, enhance service levels, and drive increased revenue and profitability based on up-to-the-minute insight into how business is running. Blue Agave's Active Performance Management (APM) suite offers manufacturers information about business performance, guided resolution of potential operating problems in real-time and root-cause analysis that enables continuous improvement. Consumer goods and electronics manufacturers will achieve rapid access to the critical information that helps to pinpoint and respond to sudden shifts in demand and supply.
